

Barbco INC.

Directional Drill

BD60-15SC

Barbco's BD60-15SC Directional Drill is powered by a 335 hp. Caterpillar diesel engine. The BD60-15SC can produce an actual 60,000 lb of thrust or pullback and rotation of 11,600 ft/lb of torque simultaneously. The Barbco design offers an automatic rod loader with 180ft. capacity and hydraulic crane, auger stake downs, rear stabilizer blade, protected rack and pinion system, large engine compartment and an enclosed cab with heat and air conditioning. The BD60-15SC electrical system is made up of modular wiring harnesses and the hydraulic system is equipped with diagnostic ports and hose identification tags. These features along with Barbco's great reputation of durability and outstanding services makes the Barbco BD60-15SC an exceptional value.

SPECIFICATIONS

Rack & Pinion Thrust /
